

# SUSTAINABLE TRANSITION PLAN

GHANA

GLOBAL  
*Brigades*

## SUCCESS INDICATORS

### HEALTH EMPOWERMENT

- **Access\*** to year-round primary care through strengthening community health workers, local hospitals, and a system for patient referral cases to access capital for more advanced medical attention
- Access to local masons and loan capital to purchase public health projects or do home renovations to improve health outcomes
- Access to clean piped water into their homes

### ECONOMIC EMPOWERMENT

- Access to a banking infrastructure to save money, create financial plans, and take out loans to invest in their economic activities

### EDUCATION EMPOWERMENT

- Waste management education
- Financial literacy education

\* The word **Access** is highlighted to distinguish that it is not Global Brigades' objective to ensure every household has every possible project. It is to ensure that families have access to our programming IF they desire to participate in it through either an affordable subsidization or full cost recovery program that is led by local entrepreneurs in or around their community.

## COMPONENTS (STEP-BY-STEP)

### 1. IDENTIFYING COMMUNITY PARTNERS

- Community selection and buy in
- Research and evaluation for baseline surveys
- Project and family profile creation (ongoing)

### 2. IMPLEMENTING THE HOLISTIC MODEL

- Medical Brigades every three-four months
- Creation and capitalization of Community Development Funds and regional bank
- Creation and training of local microenterprises for the sales and distribution of Healthy Household projects
- Empowering and building capacity of current government Community Health Worker network and strengthening the government health system
- Further capitalization of community bank as necessary to transition
- Improving the physical infrastructure of Ghana Water projects and creating an opportunity for families to have piped water brought into their homes from central distribution points

### 3. TRANSITION OUT OF THE COMMUNITY

- Conduct end-line survey
- Provide ongoing follow-up, training, and education
