

SUSTAINABLE TRANSITION PLAN

HONDURAS

GLOBAL
Brigades

SUCCESS INDICATORS

HEALTH EMPOWERMENT

- **Access*** to year-round primary care through strengthening community health workers, local hospitals, and a system for patient referral cases to access capital for more advanced medical attention
- Access to local masons and loan capital to purchase public health projects or do home renovations to improve health outcomes
- Access to clean piped water into their homes

ECONOMIC EMPOWERMENT

- Access to a banking infrastructure to save money, create financial plans, and take out loans to invest in their economic activities

EDUCATION EMPOWERMENT

- Sanitation and public health education
- Financial literacy education

* The word **Access** is highlighted to distinguish that it is not Global Brigades' objective to ensure every household has every possible project. It is to ensure that families have access to our programming IF they desire to participate in it through either an affordable subsidization or full cost recovery program that is led by local entrepreneurs in or around their community.

COMPONENTS (STEP-BY-STEP)

1. IDENTIFYING COMMUNITY PARTNERS

- Community selection and buy in
- Research and evaluation for baseline surveys
- Project and family profile creation (ongoing)

2. IMPLEMENTING THE HOLISTIC MODEL

- Medical Brigades every four–five months
- Creation and capitalization of Community Banks and consulting for new or existing micro-businesses
- Designing and implementing a clean water system (both well and gravity) with high capacity Water Councils that are trained and capitalized enough to properly administer, operate, and maintain the systems
- Creation and training of local microenterprises for the sales and distribution of Healthy Household projects
- Empowering and building capacity of Community Health Workers and strengthening existing rural health networks, regional hospitals, and clinics
- Further capitalization of community bank as necessary to transition

3. TRANSITION OUT OF THE COMMUNITY

- Conduct end-line survey
- Provide ongoing follow-up, training, and education
